

**Advanced Hospital Tips  
Full Surface**

# A570

ABH Advanced Hospital Tips (AHT) are designed for use in behavioral health facilities, hospitals, correctional facilities or any institution where there are ligature risks. While most hospital tips are designed to work only in the closed position, the AHT works whether the hinge is open or closed. Each AHT has been designed to work with the specific hinge needed for the door and frame application at hand.

Possible ligature points present without the use of Hospital Tips

Ligature points eliminated with the use of Hospital Tips
