### Dummy Spindles used with Escutcheons Door Preparartion

#### A. Mark door and Prep

- 1. Draw a horizontal centerline for the lock on both sides of door at desired height above finished floor line. Standard height for horizontal centerline is 39-15/16" (1.2 m) above finished floor.
- 2. Measure a 2-3/4" backset, draw a vertical centerline on both sides of the door.
- 3. At centerline intersection, draw a line parallel to the vertical centerline at 7/8" on both sides of the line.
- 4. At centerline intersection, draw a line parallel to the horizontal centerline at 1-1/8" on both sides of the line.
- 5. At intersection of centerlines, drill 3/8" diameter thru.
- 6. The rectangle created by steps "1" thru "4" should be routed to 1/8" deep. (SEE DIAGRAM BELOW)
- 7. Using the 3/8" dia. as a pilot hole, centerbore a 1/2" diameter hole (1/4" deep).

#### **B. Install "Dummy Spindle**

- 1. Inset threaded end of spindle into counterbored hole.
- 2. Thread the slotted sex nut through back side until tight.
- 3. Insert combination screws (2 req'd.) in the holes at top and bottom.

#### C. Proceed with standard Dummy trim instructions. 81-9086-0014-010
