and more open world

1. Installation

A. To Change Hands

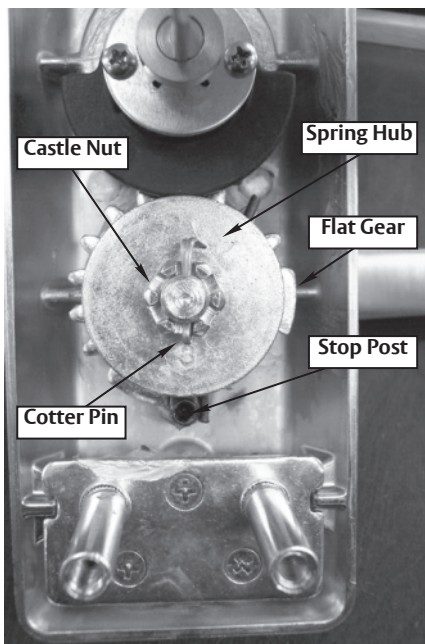

Notes:

1. During change ensure black driven gear does not rotate.
2. Please wear safety glasses and be aware of spring tension on spring hub upon removal and assembly.
3. Light lubrication is recommended under flat gear, white lithium grease can be used.

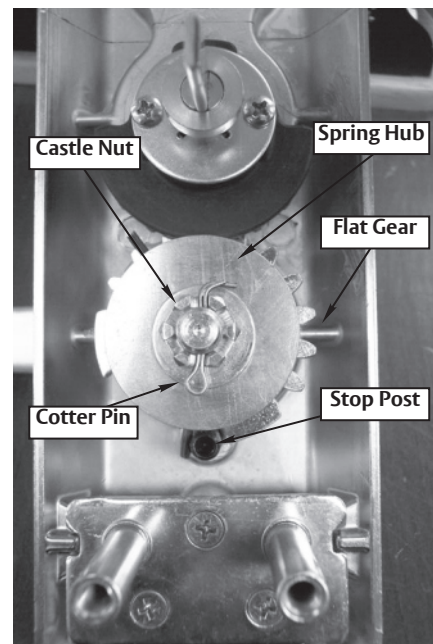

Tools Needed: Needle Nose pliers, Crescent wrench.

1. Remove cotter pin.
2. Remove castle nut.
3. Remove washer.
4. Carefully pull up on spring hub to disengage spring.
5. Remove spring and note orientation.
6. Remove lever handle.
7. Pick-up flat gear, flip and orient stop on opposite side of stop post. See pictures for orientation.
8. Install spring upside down from original orientation and place spring leg on opposite side of stop post from original installation orientation. See pictures for orientation.
