Innovative Communication Solutions Any Application. Any Size.

The functionality customers need.

The aesthetics architects desire.

The reliability engineers require.

Our access control, communication, and emergency products increase building security performance and enhance occupant safety.

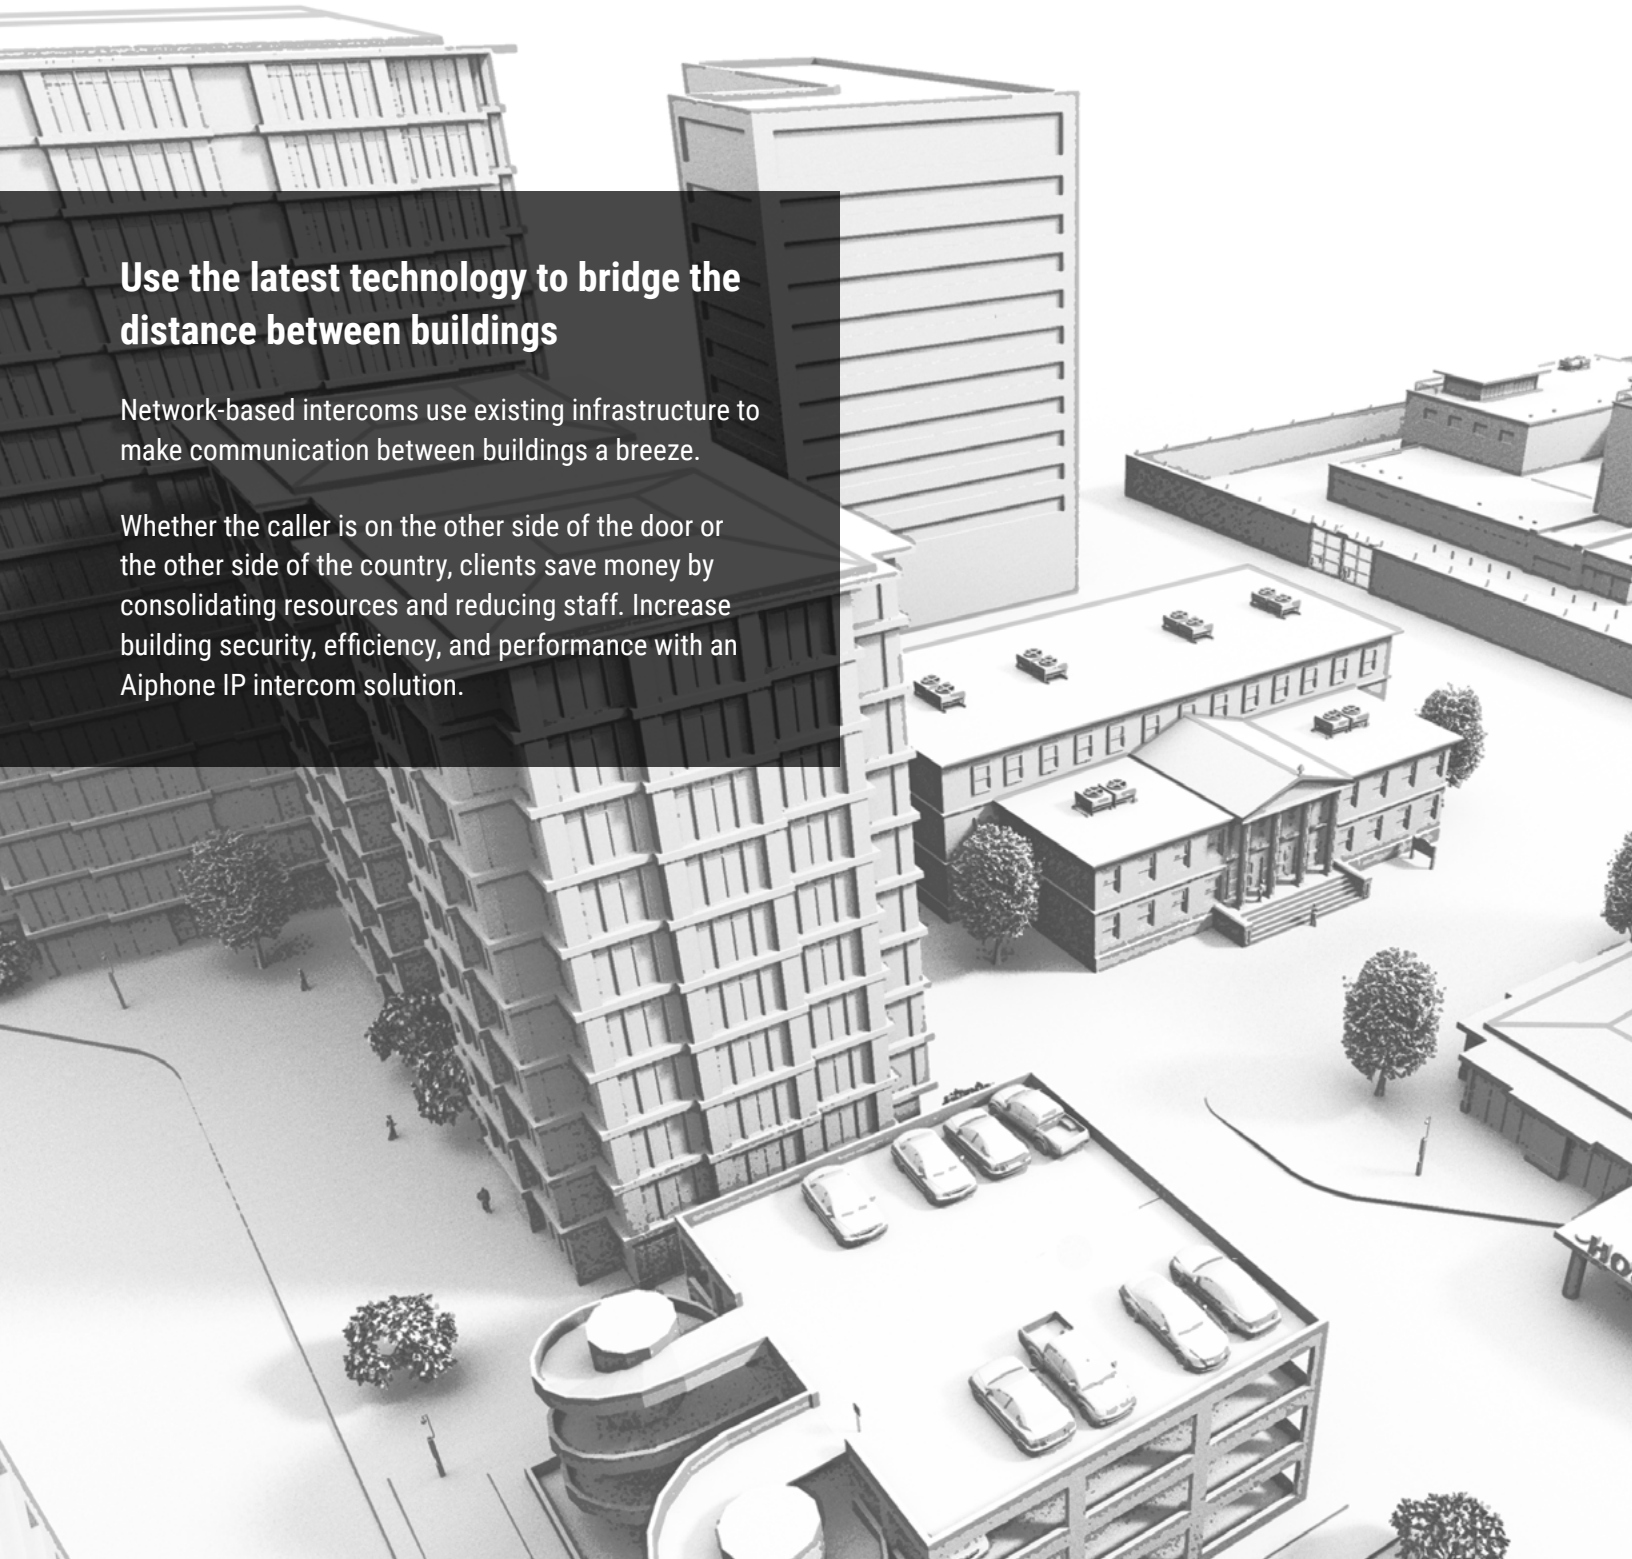

Save with Centralized Security

An IP intercom system streamlines a building's security. One person can control access and monitor spaces across a series of networked structures and locations.

Use the latest technology to bridge the distance between buildings

Network-based intercoms use existing infrastructure to make communication between buildings a breeze.

Whether the caller is on the other side of the door or the other side of the country, clients save money by consolidating resources and reducing staff. Increase building security, efficiency, and performance with an Aiphone IP intercom solution.

Secure Remote Areas with Wall Boxes & Towers

- Parking lots
- Parking garages
- Stairwells
- Hallways
- Any area where trouble might lurk
- Deter prowlers with highly visible emergency towers
- Provide personnel and visitors help points across large grounds

Respond & Reach with Call Stations

- Answer calls and pages from main office/reception
- Reach security staff from any connected station
- Have open or private conversations

Provide Help Points with Emergency Stations

- Get immediate help with emergency calling, including 911
- Dual-button stations available for general and emergency calls
- Choose your preferred mounting solution: flush/surface mount directly to wall or mount into emergency wall boxes/towers

Empower Office Staff with Master Stations

- Clearly identify visitors and determine their intent before unlocking the door
- Monitor activity throughout entire building or campus
- Immediately call other offices or buildings
- Make general paging announcements or broadcast emergencies
- Use alerts for routine notifications and unpredictable events

Control Building Access with Door Stations

- Install door stations to provide calling points for visitors at locked entrances
- Protect interior locations with additional screening
- Select card reader stations to provide authorized personnel easy entry

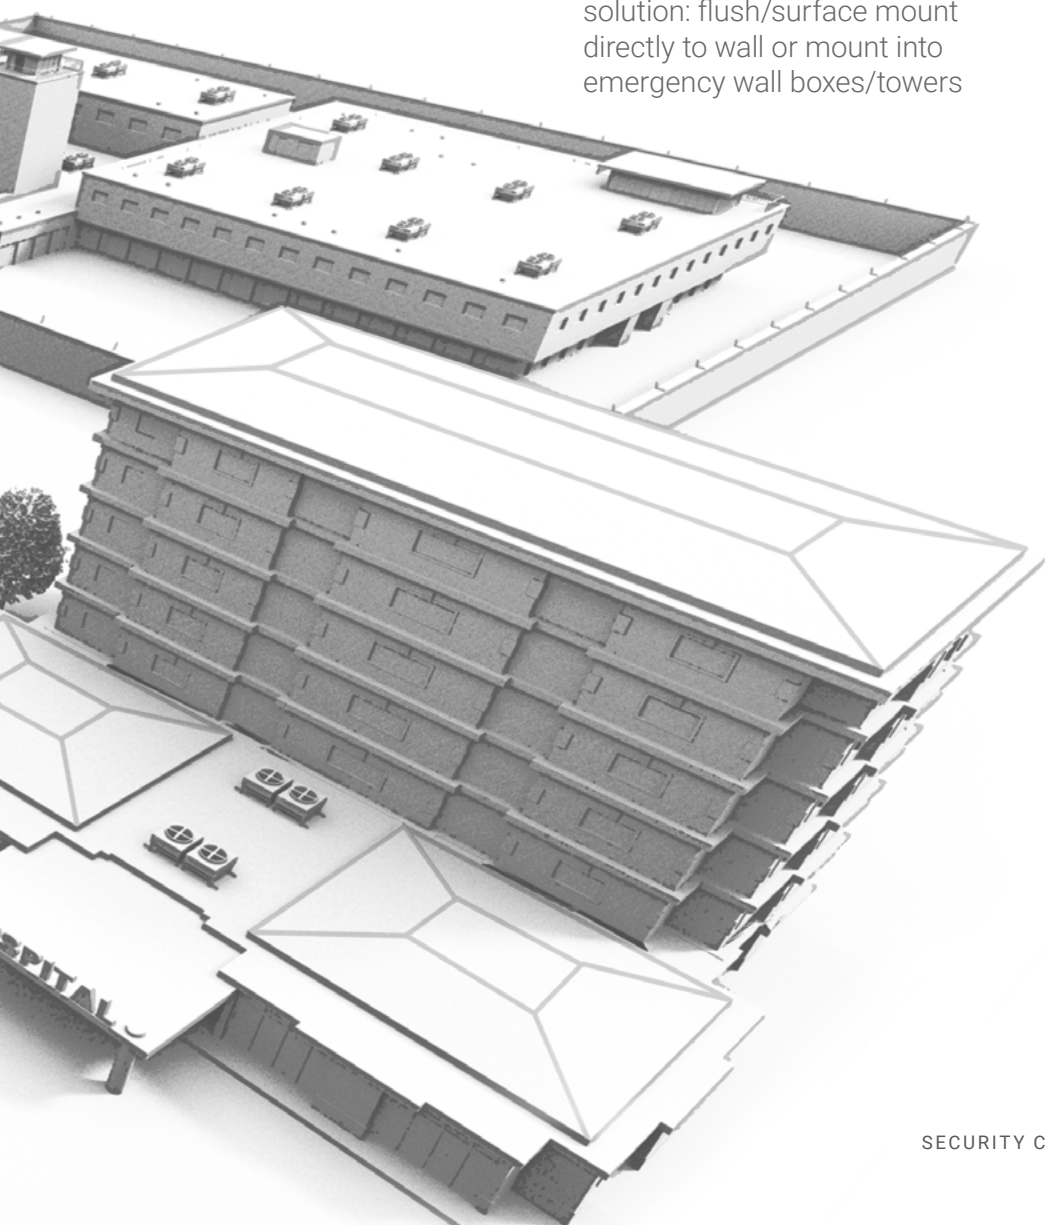

Broadcast Pages, Notifications, & Alerts

- Integrate with your PA system for all pages, alerts, and bell notifications to be clearly heard throughout your facility

Connect with 3rd Party Devices

- Capture a more comprehensive picture of the situation with CCTV camera integration
- Log activity for more accurate and detailed record-keeping
- Need proof a visitor was at your building? Save images to an NVR and reference them later

Commercial Sector

OFFICE HIGH-RISES | BUSINESS PARKS | CORPORATE CAMPUSES

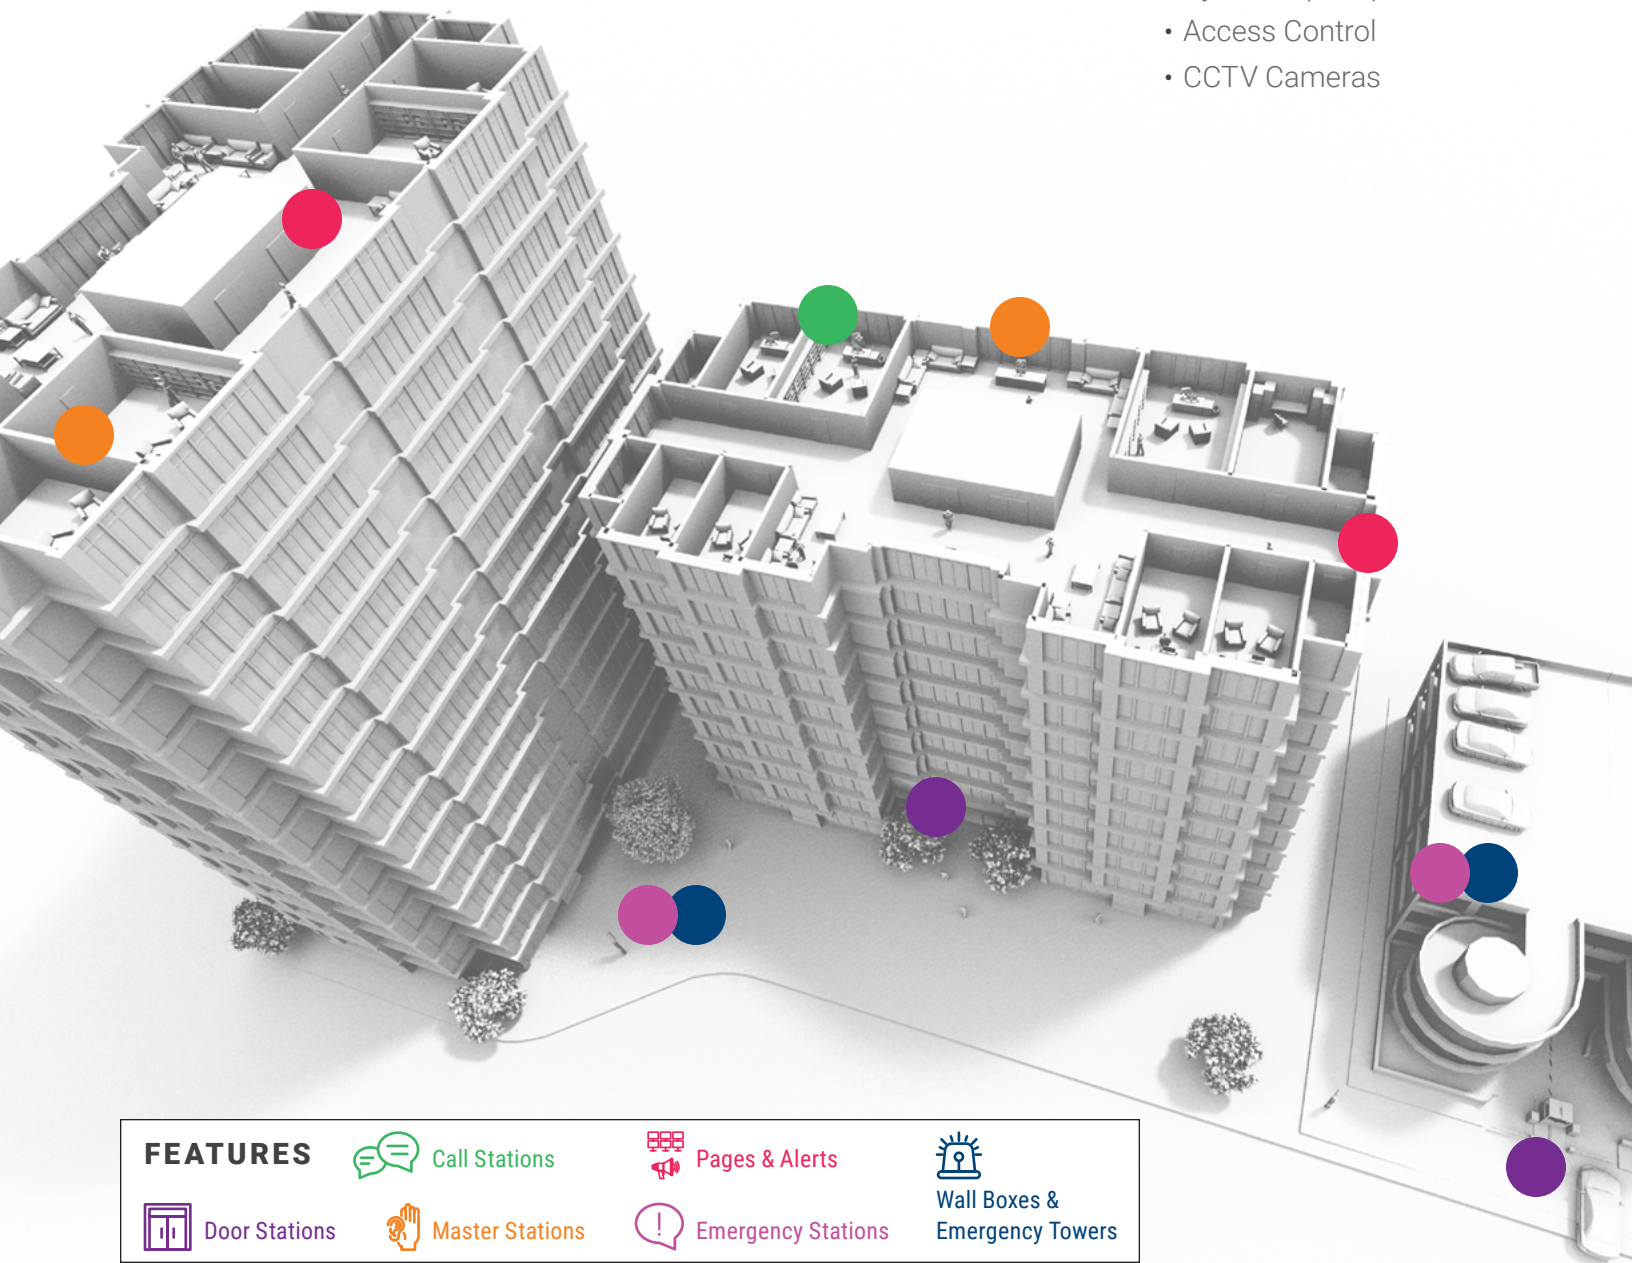

Design the Ultimate Command Center

Flex your design muscles by creating a command center worthy of a starship. Bring together the latest technologies into a single, efficient security operations center (SOC). Exceed client expectations with a versatile system, offering both scalability and cost-effectiveness. Whether a building has a staff of one – or a staff of one hundred – there are systems with the ability to use only what is needed, when it's needed.

Secure and monitor multiple buildings across corporate campuses with:

- SIP Capability
- External Dialing
- Video Management Systems (VMS)
- Access Control
- CCTV Cameras

Healthcare Sector

HOSPITALS | ASSISTED-LIVING | PHARMACIES

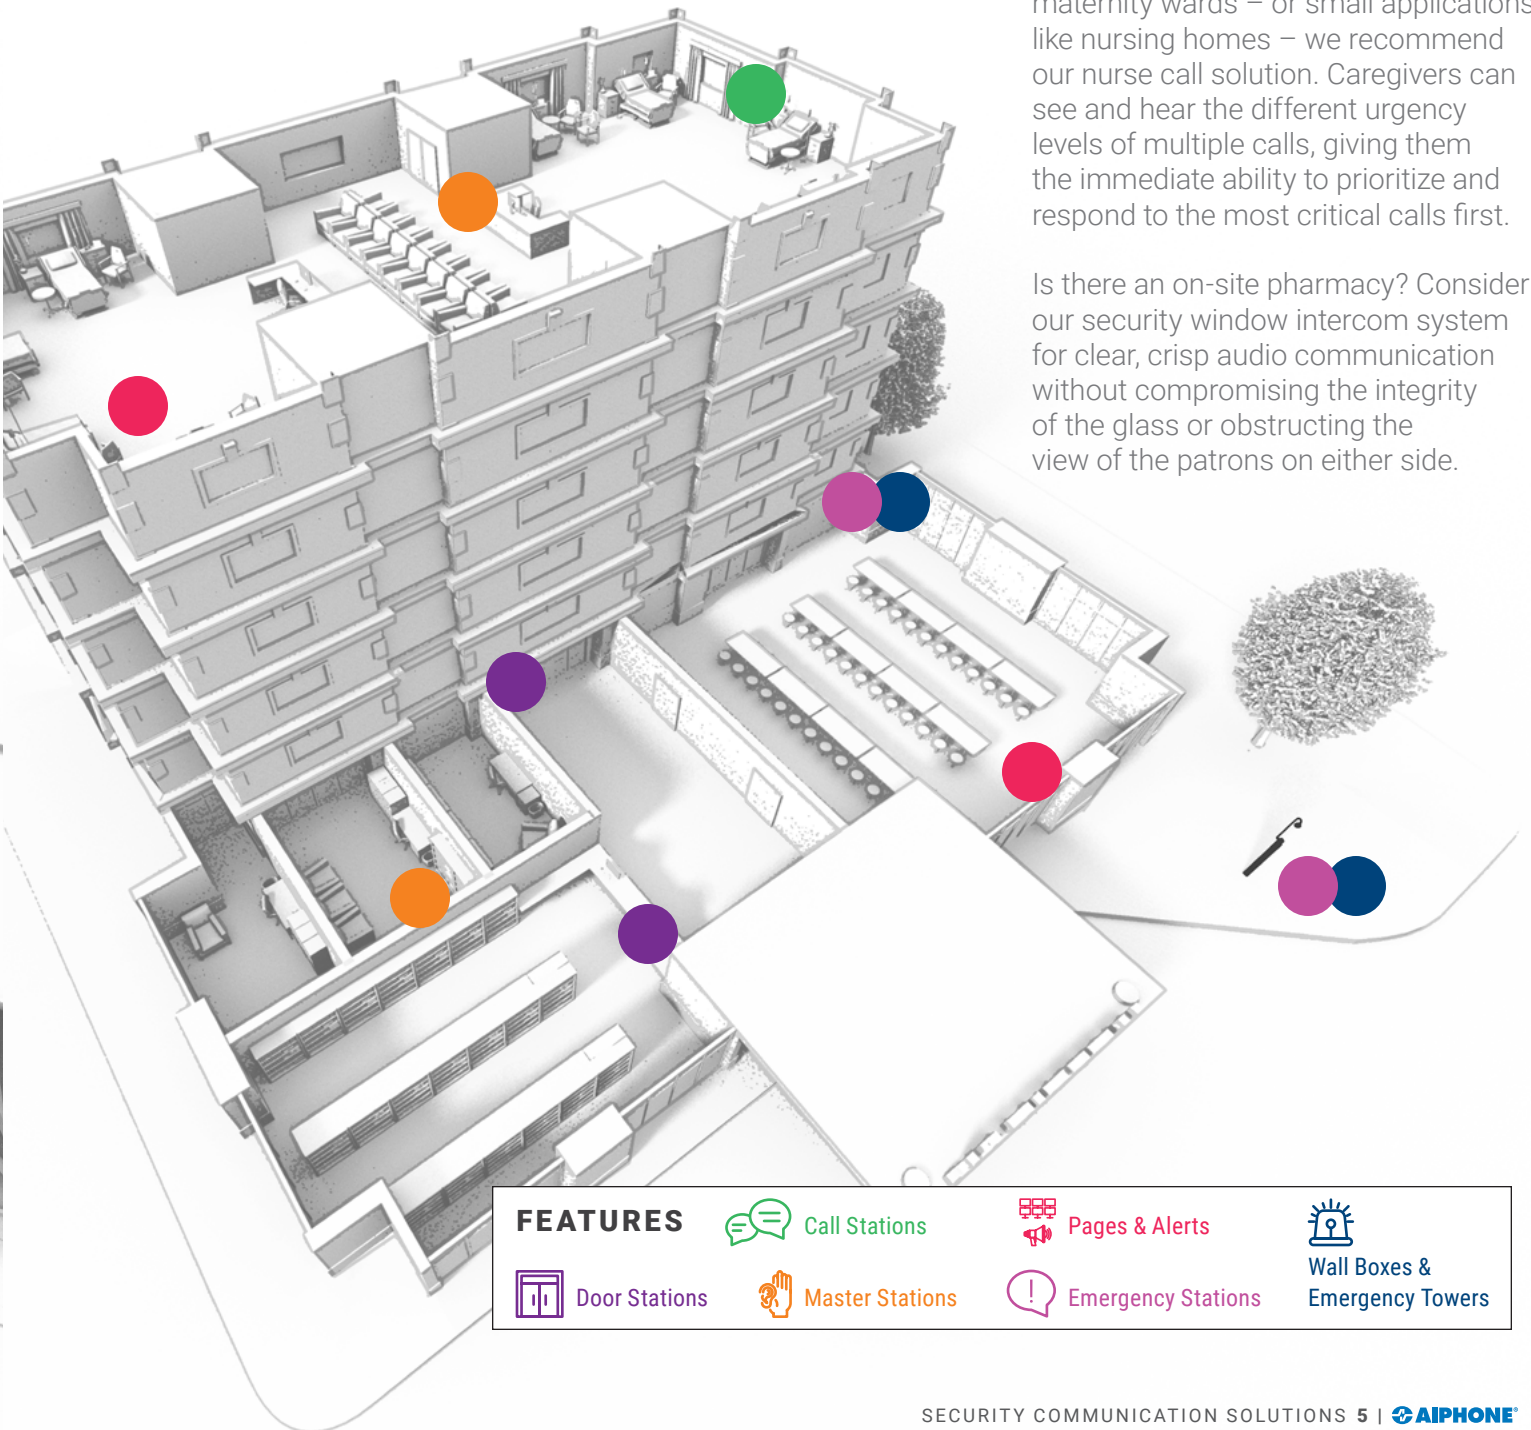

Save Time and Sustain High-Quality Care

Ensure patients and residents have vital access to their nursing staff. With room-to-room communication and emergency calling options, help can be reached at any time.

Video door stations control access into authorized areas and provide security for sensitive locations requiring additional screening.

For niche areas in the hospital, like maternity wards – or small applications like nursing homes – we recommend our nurse call solution. Caregivers can see and hear the different urgency levels of multiple calls, giving them the immediate ability to prioritize and respond to the most critical calls first.

Is there an on-site pharmacy? Consider our security window intercom system for clear, crisp audio communication without compromising the integrity of the glass or obstructing the view of the patrons on either side.

Educational Sector

DAY CARES | K-12 SCHOOLS | COLLEGE CAMPUSES

Keep Students Safe with a Feature-Rich System

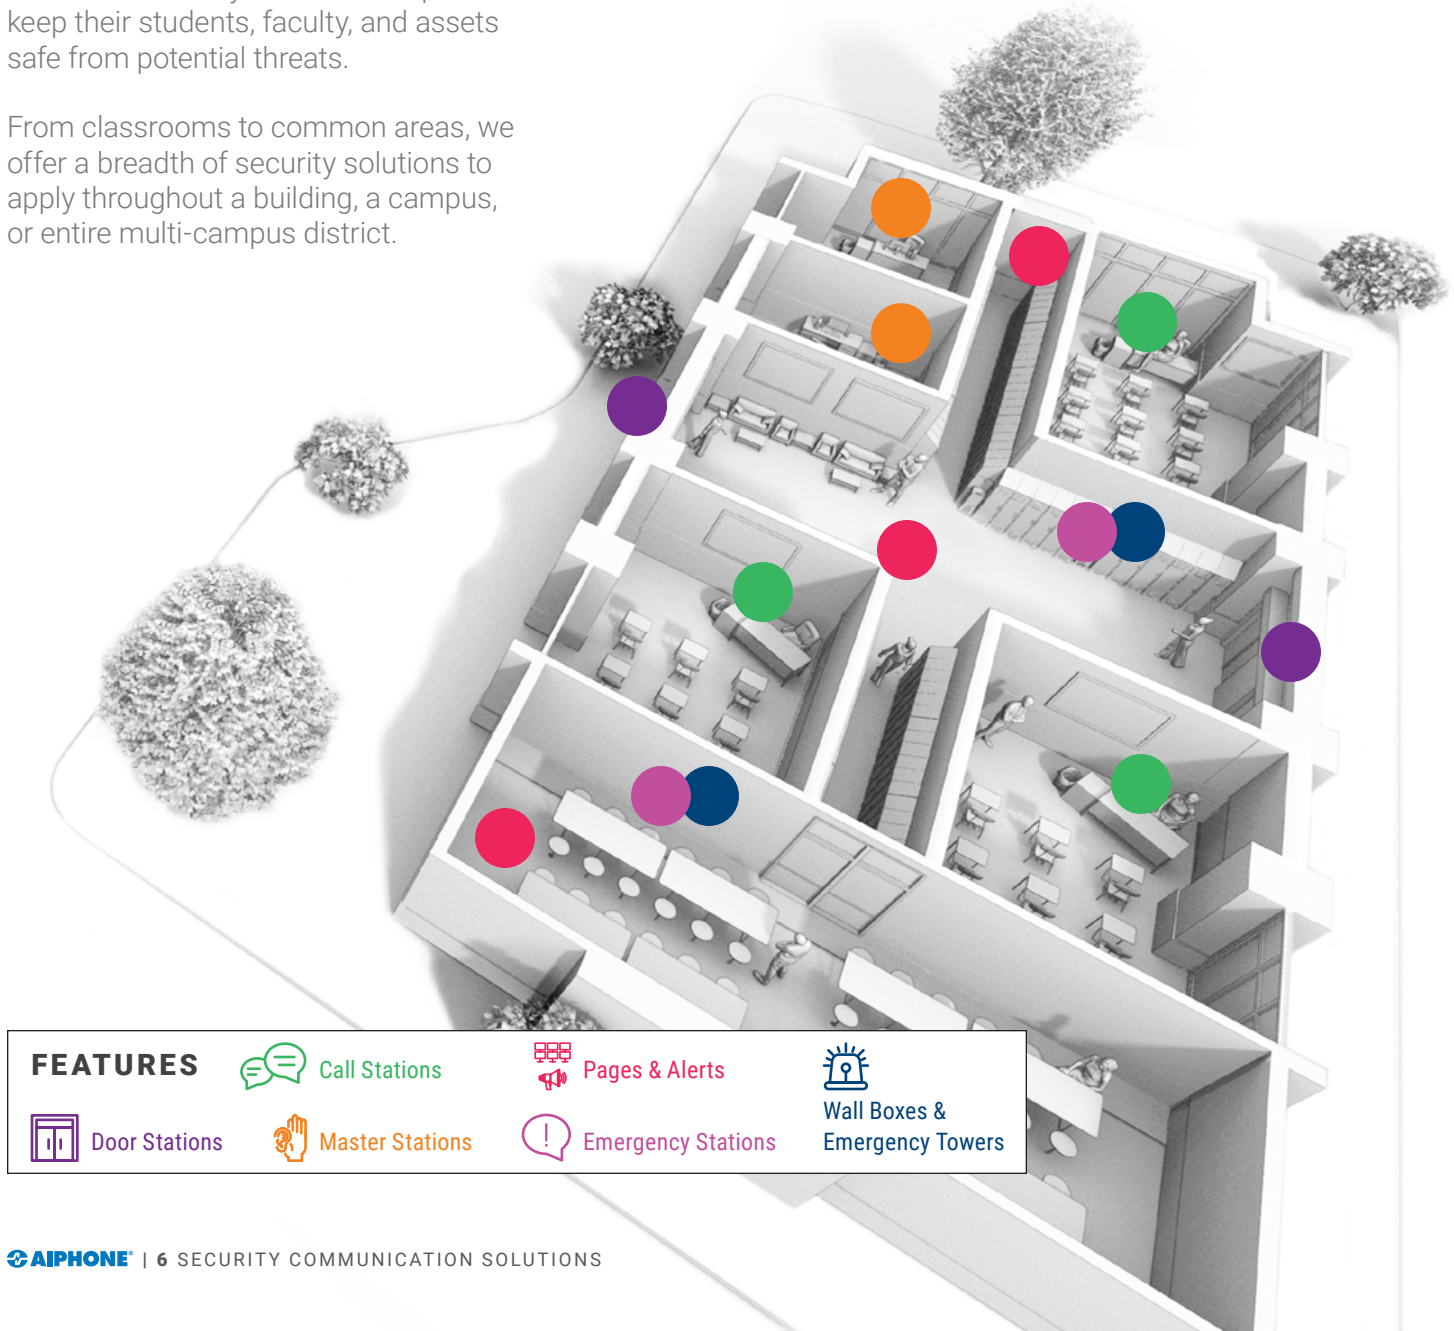

We're your go-to in finding proactive security solutions for schools, campuses, and entire districts. Our flexible systems can easily be specified for buildings of all sizes, both existing and new construction.

Building owners will be pleased with how our trusted systems can help keep their students, faculty, and assets safe from potential threats.

From classrooms to common areas, we offer a breadth of security solutions to apply throughout a building, a campus, or entire multi-campus district.

We can even help outfit large college and university campuses with emergency call stations and towers for areas where outdoor security is just as important as indoor security.

With visitor screening technology at any exterior/interior entrance, campus-wide communication, and paging systems with both manual and automatic alert notifications – we're here to help create a learning environment that places a premium on safety and security.

Multi-Tenant Sector

DORMITORIES | APARTMENT BUILDINGS | OFFICE HIGH-RISES

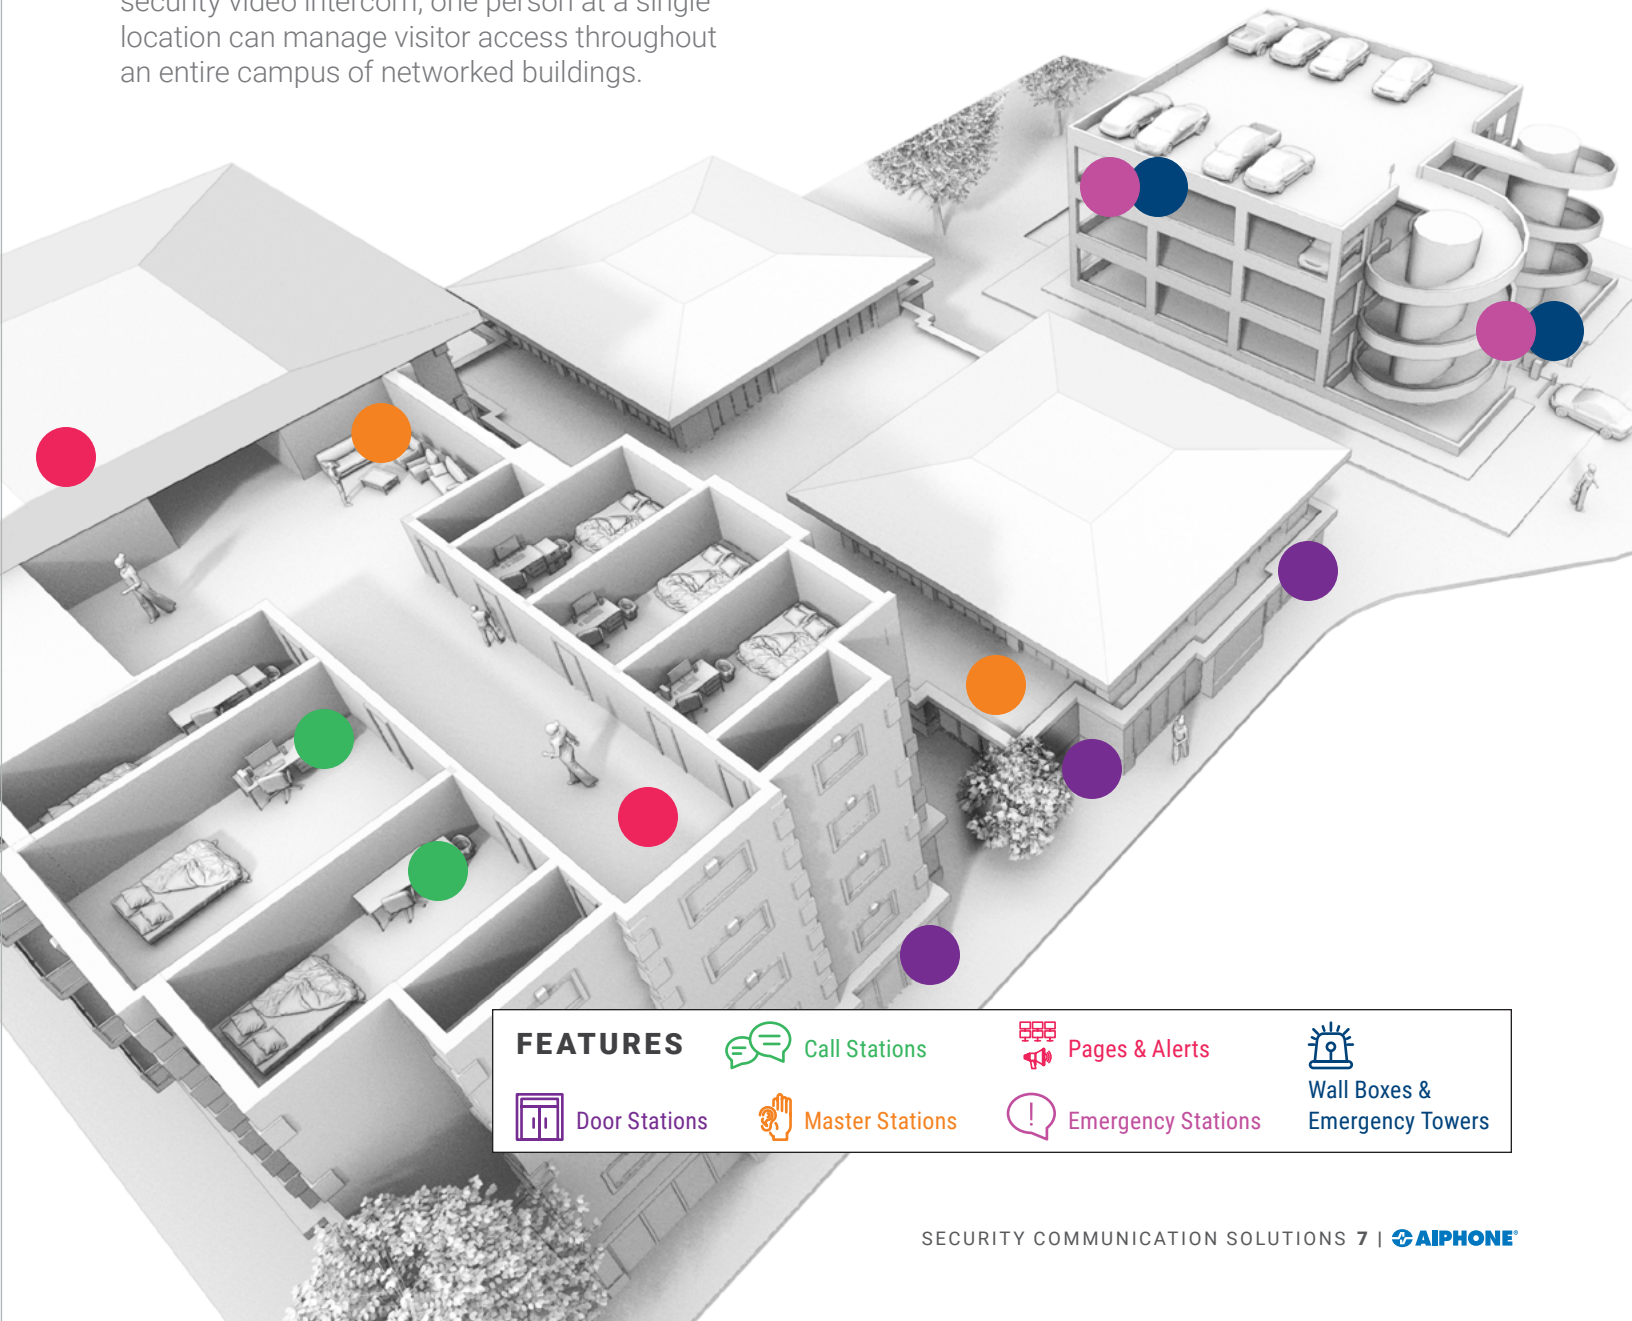

Provide Building Owners & Property Management Firms Hassle-Free Versatility

Multi-tenant buildings – whether residential, commercial, or mix-use – tend to be part of a large complex spread across many city blocks. Even larger establishments can be spread across cities or states.

Owners and management firms want centralized security to save on overhead costs for security personnel. With our versatile multi-tenant security video intercom, one person at a single location can manage visitor access throughout an entire campus of networked buildings.

With the same system, tenants or guards can identify visitors before granting them entry into their building. When tenants change, property managers can make quick, hassle-free directory updates to the system using NFC technology or logging in remotely using a VPN.

Plus, with a variety of sleek and modern stations, it's easy to meet the security needs of the building and the budget.

Government Sector

COURTHOUSES | AIRPORTS | MILITARY FACILITIES

Protect Government Agencies with a Wide Palette of Solutions

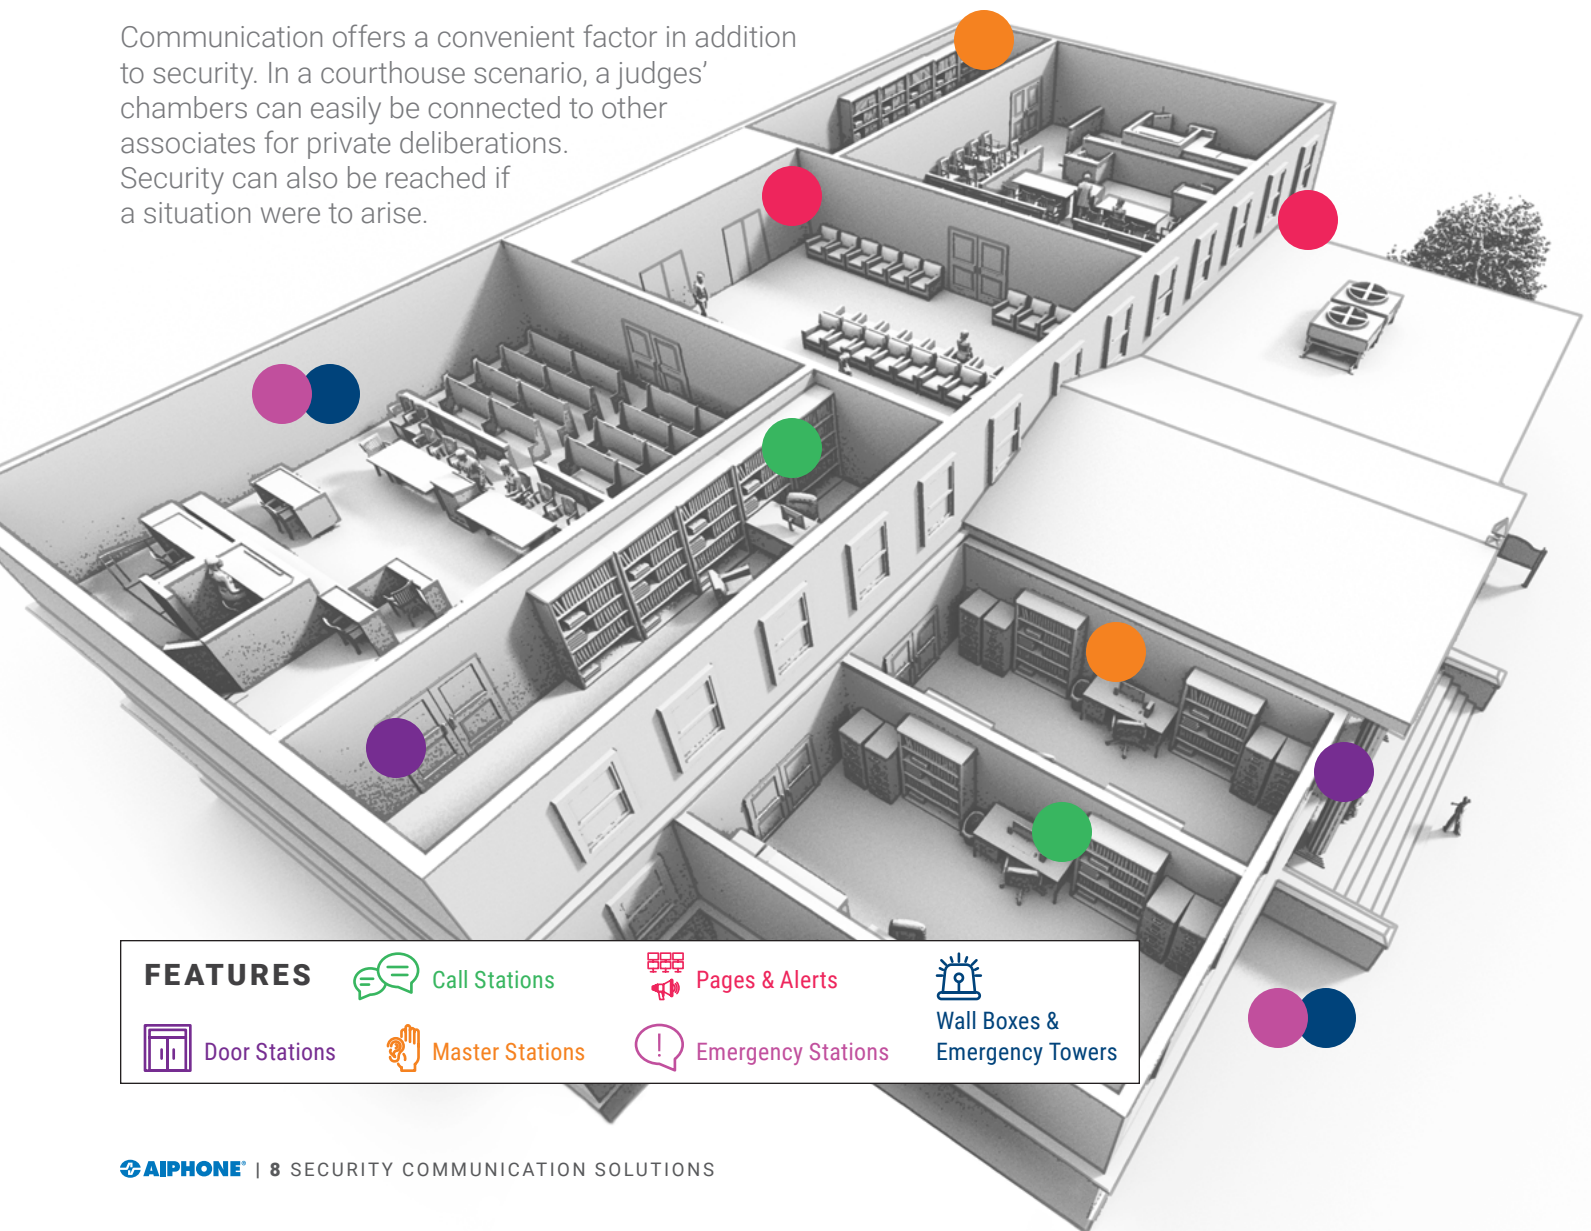

The nature of work conducted in certain government buildings may make them a target for foreign or domestic threats. This potential risk makes alerting and internal communication critical in the case of an emergency.

Multiple buildings can be notified at one time of any suspicious activity. Keep your patrons informed of any serious problems or threats as they occur, greatly reducing the negative impact these situations could inflict.

Communication offers a convenient factor in addition to security. In a courthouse scenario, a judges' chambers can easily be connected to other associates for private deliberations. Security can also be reached if a situation were to arise.

For crowded facilities, like airports, clear communication helps passengers to their destinations. If a gate changes or an announcement is broadcast, hearing the message clearly is important for travelers. Crisp, audible stations – paired with amplified speakers – will ensure announcements are heard even in the noisiest of environments.

Aiphone solutions are ideal for recruiting centers. Our reliable products provide controlled access and visitor screening for a single office and for locations serving multiple branches within a complex.

Correctional Sector

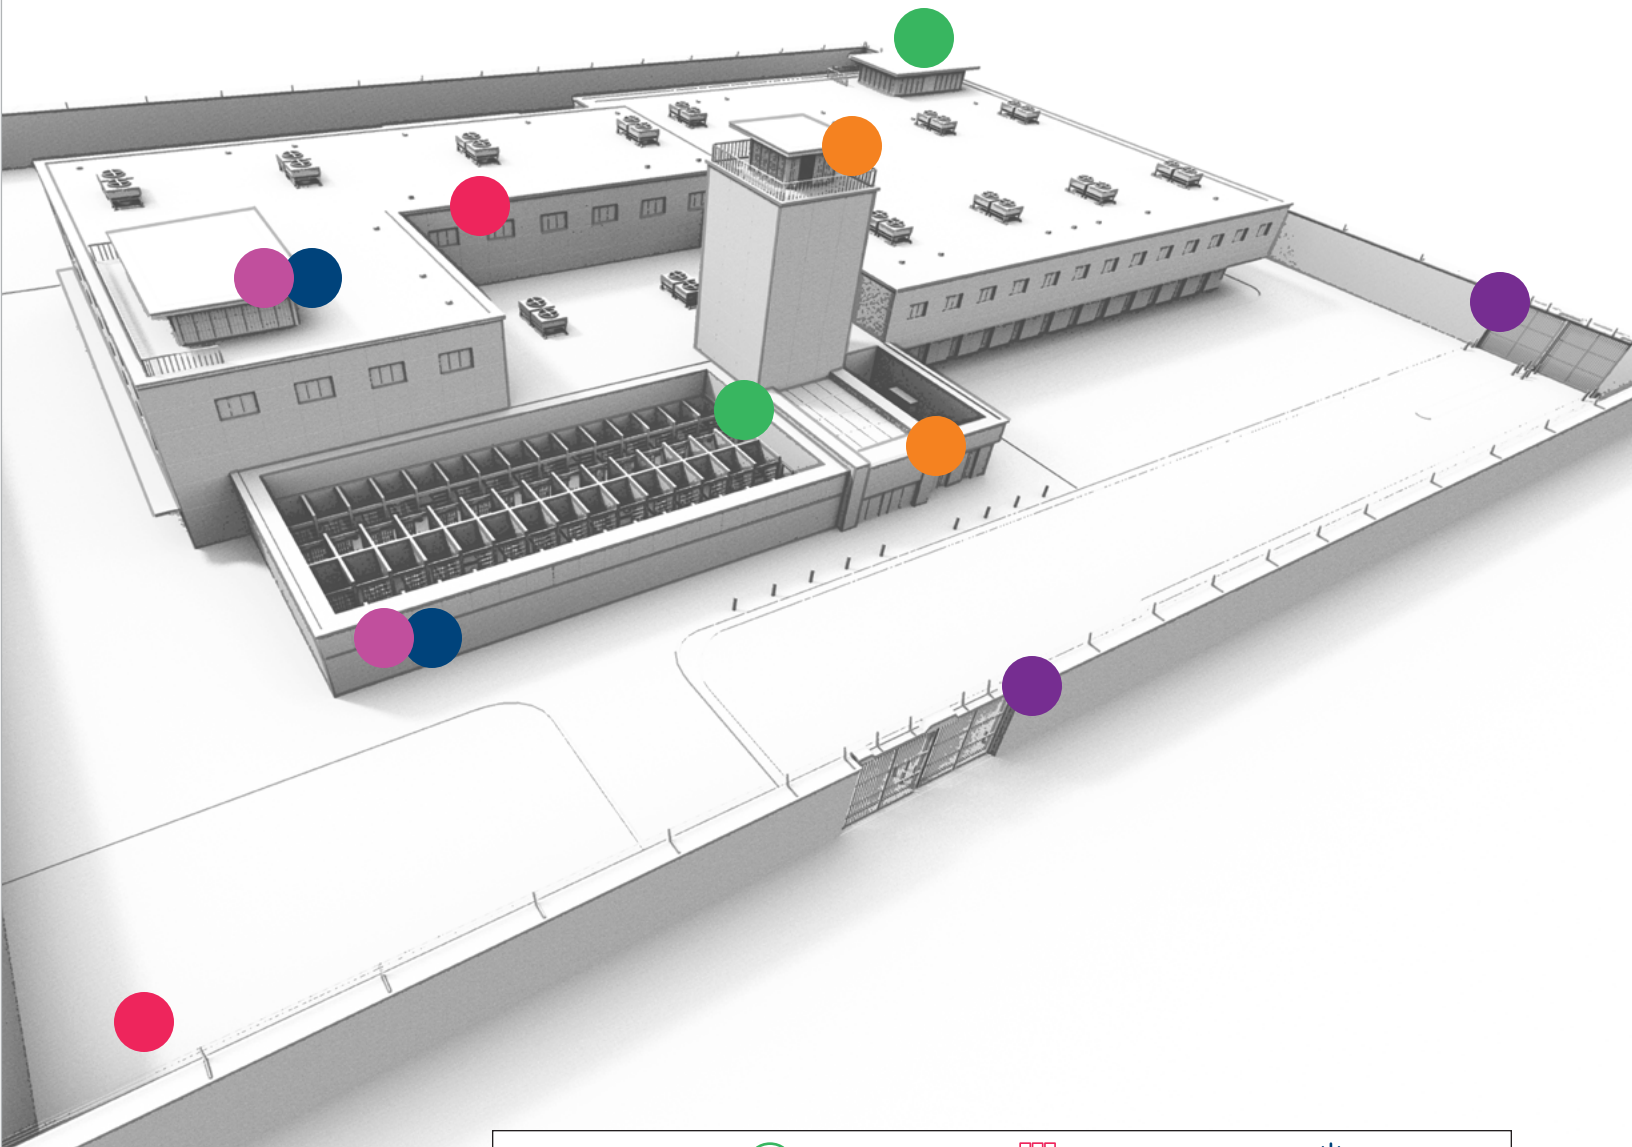

PENITENTIARIES | JAILS | DETENTION CENTERS

Secure Those Who Protect Us

Discreetly monitor cell blocks, sally ports, prison yards, or anywhere a call station is installed (via the master station). Listen to activity in areas where audio call stations are installed or see and listen to activity in areas where video call stations are installed.

Protect your investment! Many of our call stations are flush-mount and vandal-resistant, making them ideal for environments where inmates could potentially damage the devices. For further protection, many call stations have a compatible lock box as an additional barrier for areas locked up after-hours.
