## NO HASSLE 3 YEAR WARRANTY

**LIMITED WARRANTY:** Command Access Technologies warrants that its products are free from defects in workmanship and material under normal use and service. Since CAT does not control product usage, CAT makes no representation as to the degree of security conveyed by the use of any product. This warranty does not cover defects or damage which occur from improper maintenance, improper storage, improper installation, shipping and handling, ordinary wear and tear, misuse, abuse, accidents, unauthorized service, work done by others or consequential damages. CAT will not pay for the cost of repair performed other than in accordance with this warranty. CAT can only perform authorized warranty work at the factory. CAT's only liability, in tort or contract, whether under this warranty or otherwise, is limited to providing repair or replacement of any product or component part which is proven to be defective as covered by the warranty, within three (3) years after delivery from CAT to the original purchaser. Written notice of a product or component part believed to be defective, as covered by this warranty, should be sent to Command Access Technologies 22901 La Palma Avenue, Yorba Linda, CA 92887. Include Claimant's name, address, phone, and identification of the product, invoice number and date, and a brief description of the defect. Upon receipt of such notice, a CAT representative will contact claimants to where to ship such product or component part, with shipping charges prepaid, for examination and, in the event such examination reveals a defect covered by this warranty, the product will be repaired (existing product installed 6+ months) or replaced (all new installations of 6 months or less). This warranty is in lieu of all other express warranties. To the extent permitted by law, all implied warranties are limited to the duration of this warranty. CAT shall not be liable for any incident or consequential damages. Some states do not allow limitations on how long an implied warranty lasts or the exclusion or limitation of incidental or consequential damages, so the above may not apply to you. This warranty gives you specific legal rights, and you may have other rights, which vary, from state to state.

## CONTROLLED ACCESS APPLICATION

The Command Access LPM190 mortise lock may be utilized in conjunction with any access control application using standard mortise locksets. When activated the LPM190 creates a push/pull that satisfies both in-swinging and out-swinging doors. Inside free egress can be attained by turning the inside lever to manually open the door. Outside access is controlled by the access control system or by physical key override.

**CRU2** - Adjusts incoming voltage to maximize the efficiency of our 12 or 24VDC locks.

**VC Series** - Voltage converter takes incoming voltage and steps down to out put clean & consistent 12VDC or 24VDC to power any locking device, reader & more.

## CYLINDRICAL LOCK SWITCH OPTIONS

All Command Access modified cylindrical lever locks are available with REX monitor switches. All switches are SPDT (single pull, double throw) and either mechanical or reed type. With the exception of a few field installable REX kits, all other REX switches must be installed at the factory. Here is a list of available switches and their definition.

REX - Request to Exit or AE switch available (depending on manufacturer) - sends a signal to alert the control panel that the door is about to be opened by someone intending to exit from within the secured area

REXKIT-CL - Field Installable REX (Request to Exit ) switch kits are available for a few cylindrical locks. Each kit includes the switch assembly and all necessary items needed for quick field installation.

# MOTORIZED LATCH RETRACTION

## THE FASTER, QUIETER, POWER EFFICIENT SOLUTION

Command Access has applied our continuous improvement mindset to our motorized latch retraction for over ten years, taking our MLRK1 series to a new level that allows for a fast, quiet, smooth, and consistent latch retraction. Each motor assembly is designed specifically for each manufacturer's device, rather than a "one size fits all" approach. Many are available with an optional built-in request to exit switches to save time & money on the installation.

In addition, we offer our IMPROVED motor module with audible diagnostics & true electronic dogging & our patent-pending "PTS" push-to-set technology.

Our motor module will let you know whether your kit is getting over or under-voltage, hits a mechanical obstruction & more. True electronic dogging is ideal for visually matching mechanical dogging so customers can see whether the door is unlocked or not, reducing mechanical wear & noisy depression of the push pad when in the open state. If the push pad is pulled from the electronically dogged state, our anti-tampering feature automatically re-engages at set time intervals, reducing service calls. Here is what's great about our "PTS" technology. While we aim to set every exit device correctly at the factory before shipping, we cannot account for every condition of every door opening in the field. Instead of our customers having to make several trips out to a job site to re-adjust an exit device, the device is now adjustable at the door by virtually anyone with a credential. Here's how "PTS" works in three easy steps;

- **Step 1 – To enter PTS mode: Depress MM5 button & apply power. The device will emit 1 SHORT beep. The device is now in programming mode.**
- **Step 2 – while depressing the push pad, activate the device. (i.e. presenting the credential to the reader)**
- **Step 3 - continue to keep pad depressed, the device will emit 1 LONG beep. After the beep has stopped, release the push pad & now adjustment is complete. If not to your liking repeat the three steps.**

### TYPICAL LATCH RETRACTION INSTALLATION FLOW CHART

A typical Command Access latch retraction device installation includes the device, the power transfer, and a power supply. The access control company integrates their card reader and controller to send a signal to the power supply that in turn unlocks the device (see example to the right). More advanced installations additionally incorporate auto operators and palm buttons for ADA/Barrier Free and hospital applications (see page 9 for an installation flow example).

### APPLICATIONS INCLUDE:

- Hospital entrances and hallways
- Universities and institutions
- ADA compliance
- Barrier Free compliance

- Electric dogging - Full push-pad retraction - Quieter operation in electronically dogged state.
- Push to Set "PTS" technology for easy post-installation electronic adjustment.
- Vandal Resistance - If push pad is pulled from open position, motor will re-set itself & pull back the latch without fail
- Adjustment screw for easy Electronic latchbolt adjusting.
- On-board audible self diagnostics for fast & easy troubleshooting at the opening.

*When retrofitting our MLRK1 kit onto a device over 10 years old , please call factory for compatibility.*

## EXIT DEVICE SWITCH OPTIONS

Command Access offers a variety of factory and field installable exit device monitoring switches. Each mechanical switch is SPDT (single pull, double throw) and capable of .5 amp @ 24 volts. Common applications employ these switches to monitor egress and device positioning to ensure the most secure assembly possible.

**REX** - Request to Exit switch - sends a signal to alert the control panel that the door is about to be opened by someone intending to exit from within the secured area. Field Installable REX (Request to Exit ) switch kits are available for a variety of exit devices.

**LBM** - Latchbolt Monitor switch - sends a signal to the control panel to monitor the position of the latchbolt. Field Installable LBM (Latchbolt monitor ) switch kits are available for exit devices.

# TERMS AND CONDITIONS

 ALWAYS HERE TO HELP

**PRICES:** All list prices are subject to change without prior notice and are not guaranteed. All prices are per unit (each) unless otherwise specified and do not include sales or local taxes. All shipments will be made at prices prevailing at time of shipment.

**EXPEDITE FEE:** A customer may request that an order be expedited. An additional charge of up to 25% of the cost of the expedited items may be charged. Expedite lead times are subject to availability. Please call for approval.

**PAYMENT TERMS:** The standard credit terms of Command Access Technologies (herein called CAT) are 2% 10 days net 30. Net 30 means the check shall be received at CAT on or before 30 days from the date of the invoice. Interest will be charged at the rate of 2% per month on past due accounts.

**ACCEPTANCE OF ORDERS AND/OR QUOTATIONS:** Possession of prices from CAT does not commit CAT to accept any order. CAT reserves the right to refuse any order and will not be bound to fulfill any order until it has been accepted by a representative of CAT and confirmed by a written acknowledgement. Quotations are valid for ninety (90) days following the date of the quotation.

**OPEN ACCOUNT STATUS:** CAT reserves the right to decline or discontinue direct sales to any customer who does not meet an annual minimum sales requirement of **5000.00** in invoiced purchases.

**ACKNOWLEDGEMENTS:** An acknowledgement is an exact copy of a customer's order as entered by CAT and should be verified by the customer. If the acknowledgement does not agree with said customer's understanding CAT should be advised within (3) three days or the order will be billed as acknowledged. CAT's sales terms shall apply irrespective of any special stipulation appearing in customer order, unless specifically acknowledged and accepted by CAT.

**RETURNED GOODS:** The customer must advise customer service at CAT of merchandise to be returned and a Returned Goods Authorization (RGA) will be issued. CAT will not accept goods returned without an RGA. Full credit against further purchases or a replacement will be made at the option of CAT if upon investigation reveals that goods were shipped in error or if goods are defective in workmanship or material. Otherwise, a restocking fee of not less than (25) twenty-five percent will be charged. All merchandise must be PREPAID AND PROPERLY PACKED. All C.O.D. orders shipped to CAT will be refused. Returned goods must be packed in their original boxes. If product has been installed it cannot be returned but only repaired, please consult factory for repair costs (unless under warranty). No credit will be given for product not in its original form unless, upon CAT's inspection, product is found to be defective. If product is returned as defective and is found to be operational, product will be returned to customer (C.O.D.) and no credit will be issued.

**MINIMUM CHARGE:** No order will be invoiced for less than \$25.00 net plus shipping charges.

**CHANGES OR CANCELLATIONS:** When a special order is accepted, and entered, no change can be made and the order is non-cancellable. Cancellation for items already packed for shipment will be removed if possible. A twenty-five percent (25%) restocking fee will apply.

**CLAIMS OR SHORTAGES:** Every possible care is taken in the final examination of packing of goods, and no complaints will be accepted unless made promptly upon receipt of goods. No claim will be allowed for work done by others, consequential damages or other expenditure, and CAT's understanding to repair or replace defective goods is its only liability. No claim for damage, shortage or loss in transit will be accepted unless notice is given in writing to the carrier and to CAT within (10) ten days of receipt of goods.

**BACK CHARGES:** CAT is not responsible for, does not authorize, and will not accept any charges for the cost of labor, travel or material incurred by anyone other than CAT for any installation, repair, service, or replacement unless incurred with CAT's prior written consent and agreement.

**FREIGHT CHARGES:** All goods are invoiced F.O.B. CAT, Yorba Linda, California. Freight charges are prepaid and are added to invoice. Consignee pays C.O.D. freight charges when delivered to the Freight Company; the shipment becomes the property of the purchaser, who assumes the risk of loss or damage in transit. If invoice exceeds \$1,000.00 net, full service freight by FedEx or our choice within the continental U.S.A. (excluding Hawaii, Alaska, Guam & Puerto Rico) is deductible, provided invoice is paid within set terms. Not all products qualify for freight deduction. Airfreight and other special shipments are not deductible. CAT does not ship directly to Canada; for all Canadian destinations please contact Connection Network Agencies at 905-823-3002.

**PRODUCT CHANGES OR CANCELLATIONS:** CAT reserves the right to modify or discontinue any price, product, design, function and finish without prior notice.

**PRODUCT FINISHES:** Although CAT modifies products with the finest protective coatings, they do have their limitations. In time, they might deteriorate from extremes in climate, frequency of use, perspiration, or other factors. CAT does not consider excessive wear or tarnishing of the finish because of any of the above conditions as a defect. It is considered a normal process, which cannot be avoided. Thus, CAT cannot guarantee product finishes and will not repair or replace finishes under this warranty.
