

Versatile & Resistant

BHSS Trim

Traditional lever and knob locks are often targets for vandals in educational environments, especially in low traffic areas. Corbin Russwin's innovative BHSS trim is versatile and suitable for any vertical market. It integrates the lever and escutcheon, creating a superior design that is difficult to damage and the lock's low profile resists abuse and eliminates catch points, typically found on traditional lever trim.

Experience a safer
and more open world

BHSS Trim

for Educational Settings

FEATURES

- Aesthetic, modern design with low profile lever and escutcheon
- Uses the ANSI/BHMA Grade 1 ML2000 Series mortise lock
- Available in 36 functions including electrified options
- Uses standard mortise prep, with only 2 additional holes
- Integrates with traditional lever trim on inside of door
- UL Listed for use with Fire Rated doors
- ADA Compliant
- Patented design and construction

BENEFITS

- **Beautiful:** tapered surfaces and escutcheon shape lend a modern design aesthetic to school facilities
- **Strong and durable:** lock exceeds ANSI/BHMA Grade 1 requirements to withstand abusive environments
- **Versatile:** 36 functions, including electrified can be used on many opening types
- **Long lasting:** Unique design reduces risk of damage from equipment or vandalism
