

E-Plex M-UNIT

User-friendly portable programming and auditing device

What is the E-Plex M-Unit?

The E-Plex Offline M-Unit is a handheld diagnostic and configuration file transfer tool. It is designed to be used with E-Plex locks that conform to the most recent versions of both the Aurora and LUNA software clients. The M-Unit can help set up offline E-Plex locks by gathering data from the Aurora/LUNA client and transferring it the lock. This device can also transfer audit trails and be used as a site survey tool for E-Plex wireless locks.
