

SDCs IP100 Power over Ethernet Capable Electric Latch Retraction Kit enables electric access control and dogging of mechanical exit devices. When energized the motor retracts the exit device latch and pulls the pushpad into the dogged (depressed)* position enabling momentary or sustained push and pull operation of the door. 12VDC @ 700/110 mA
The latch retraction mechanism may be activated by an access control, remote control device or building automation system. The exit device always provides uninhibited egress.

* Except where noted for latch retraction only

Adams Rite Exit Device				
Opening for	Field Retrofit Kit	LIST	Factory Installed	LIST
36"	IP100ARK	676.00	IP100AR	730.00

Models	
Rim Mount	8700 / 8800 / 3700

Options		
LRAR1R	REX Status Kit	112.00

* Note: Retracts only the latch
