Product Bulletin

Installation is a snap with McKinney ElectroLynx® PoE Harnesses with RJ-45 Connectors

Connecting ASSA ABLOY Group brands Corbin Russwin and SARGENT next generation Power over Ethernet (PoE) enabled hardware is quick and easy with McKinney ElectroLynx® harnesses. Molex connectors connect the hinge to the harness, and a standard RJ-45 connector connects the harness to the electrified door hardware.

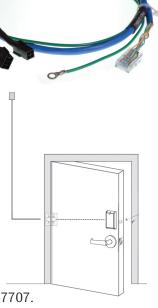

The following hardware uses the new RJ-45 connectors:
- Corbin Russwin IN220
- Corbin Russwin Access 700 PIP1
- SARGENT IN220
- SARGENT Passport 1000 P1

Harnesses are available with the RJ-45 connector attached or loose in the package. The harnesses range in length from 30" up to 156" with custom lengths available (consult factory).

Accepting orders immediately with a 1 to 2 day lead time for standard sizes.

For additional information contact your local sales representative, ASSA ABLOY Door Security Solutions Representative, or call 800-346-7707.
