

MEDECO³ LOGIC AND MEDECO XT ECYLINDERS, LOSS & LIABILITY SOLUTION

In addition to mechanical solutions, Medeco Padlocks can be upgraded to eCylinders, providing Controlled Access, Accountability, Physical Security, and System Management in a portable locking device.

More than just a way to protect your facility, eCylinders are a business tool that can lead to a substantial return on investment.

Controlled Access—Keys are electronically programmed to open only specific locks during specific time frames.

Accountability—Audit information is recorded in both the lock and key, showing authorized accesses and unauthorized attempts.

Easy Installation—No hard wiring required. Ideal for remote locations.

Electronic Rekeying & Scheduling—Respond quickly to lost or stolen keys.

Physical Security—Attack-resistant design and tamper-proof features.

LEVEL

3

LOSS & LIABILITY SOLUTION
For applications where the ability to schedule and audit access is needed in a retrofit cylinder.

MEDECO, YOUR ONE KEY SOLUTION

Medeco believes in giving customers the greatest control over their security.

Medeco Padlocks provide protection for some of the most secure and trusted sites in the world. From trucking to ammunition facilities to retail warehouses and a vast array of other applications, Medeco Padlocks provide the ultimate in physical protection and key control.

Patented Key Control—Protects against unauthorized duplication of your keys.

Special Angled Key Cuts—Requires a special key cutting machine and access to Medeco specific blanks, available in a variety of restrictions to support every need.

Can Be Masterkeyed—Can be masterkeyed into a system containing Medeco BiLevel and Medeco³ mechanical as well as Medeco³ Logic eCylinders.

MEDECO PROTECTOR II SERIES PADLOCKS

The Protector II Series padlock is made of stainless steel and offers excellent resistance to harsh weather and extreme conditions.

The hardened boron alloy steel shackles stand up to physical attack, providing strong resistance against cutting, sawing and prying. The patented Medeco³ mechanical cylinder resists picking, drilling and other sophisticated forms of physical attack.

Protection from Shackle Attack—Hardened boron alloy steel shackles (5/16" and 7/16" diameters) provide strong resistance against cutting, sawing and prying. Available in both 1 3/8" and 1 7/8" lengths.

Proprietary Deadlocking Shackle—Unique deadlocking shackle locking mechanism for resistance to physical attack.

Weather Resistant—Made of solid stainless steel to provide excellent resistance in harsh and extreme weather conditions.

Protection From Physical Attack—Medeco³ cylinders are UL437 listed and stand up to drilling, picking and other forms of physical attack.

Picking and Bumping Protection—Medeco³ cylinders use a sidebar that prevents the key from rotating until it is elevated, rotated and aligned in the correct position. This feature protects against bumping and picking attacks.

LEVEL

2

MECHANICAL HIGH SECURITY
For applications where key control and defense against picking and drilling is needed.

Product Recommendation:
Medeco³ Protector, System, G8R or Hockey Puck Padlocks

MEDECO SYSTEM SERIES PADLOCKS

The Medeco® System Series padlocks offer flexibility for a multitude of applications. Available in an indoor/outdoor weather resistant design or with a shrouded shackle.

Both models utilize a boron alloy steel shackle which provides protection to resist cutting and increased tensile strength to resist pulling attacks.

The System Series Padlocks can be ordered with a variety of different cylinder technologies, including those offering the best in patented control.

MEDECO G8R & HOCKEY PUCK PADLOCKS

For extreme environments such as trailers, cargo containers, and gates, Medeco® offers the G8R padlock constructed of stainless steel. Available in either a stainless steel shackle for maximum corrosion resistance, or hardened steel to withstand severe physical attack.

The Medeco® Hockey Puck style padlocks use a shackle-less design for the highest level of protection against cutting attacks, and offer patent protected key control.
