 <p>A technical drawing of a cylindrical door closer. The drawing shows a side view with two horizontal lines representing the main body. On the left end, there are three circular components stacked vertically, with a dimension line indicating a total height of 9/16". The main body has a length dimensioned as 11-1/8". There are mounting brackets on both ends of the cylinder.</p>	N/A	Cal-Royal N900PBF

 <p>The diagram shows a side view of a door closer. It is a long, rectangular metal component with rounded ends. On the left side, there are two circular mounting holes, with a dimension line indicating they are 1 inch from the edge. On the right side, there are also two circular mounting holes. In the center of the top and bottom surfaces, there are rectangular protrusions and recessions, respectively, representing the mounting points for the door and the door frame. A dimension line at the bottom indicates the overall length is 11-1/8 inches.</p>	N/A	Sargent 1431

 <p>The diagram shows a side view of a door closer, similar in design to the one above. It is a long, rectangular metal component with rounded ends. On the left side, there are two circular mounting holes, with a dimension line indicating they are 1 inch from the edge. On the right side, there are also two circular mounting holes. In the center of the top and bottom surfaces, there are rectangular protrusions and recessions, respectively, representing the mounting points for the door and the door frame. A dimension line at the bottom indicates the overall length is 10-3/8 inches.</p>	N/A	Sargent 281
