 <p>The diagram shows a side view of a door closer. It is a long, rectangular metal component with rounded ends. On the left side, there are two circular mounting holes, with a dimension line indicating they are 1 inch apart. On the right side, there are also two circular mounting holes. In the center of the top and bottom surfaces, there are rectangular protrusions and recessions, respectively, representing the mounting points for the door and the door frame. A dimension line at the bottom indicates the overall length of the device is 11-1/8 inches.</p>	N/A	Sargent 1431

Existing Closer Dimension	Corresponding PDQ Closer	Cross Reference
 <p>The diagram shows a side view of a door closer, similar in design to the one above. It is a long, rectangular metal component with rounded ends. On the left side, there are two circular mounting holes, with a dimension line indicating they are 1 inch apart. On the right side, there are also two circular mounting holes. In the center of the top and bottom surfaces, there are rectangular protrusions and recessions, respectively, representing the mounting points for the door and the door frame. A dimension line at the bottom indicates the overall length of the device is 10-3/8 inches.</p>	N/A	Sargent 281
