

INSTALLATION INSTRUCTIONS

1. Select and determine degree of dead stop from chart on back side of page.
2. Locate " A " and " B " dimensions on door and frame.

3. Install channel on door with "A" dimension sex bolt. Locate "C" dimension sex bolt hole making sure that channel is horizontal and parallel with stop strip. Drill 1/2 (12.7) dia. sex bolt hole and finish installing holder.

Notes:

- All hollow metal frames should be properly reinforced with $3 / 16$ " (4.8) min. thickness x 12" (304.8) min. length reinforcement plates.
- All hollow metal doors should be reinforced with 2-1/2 (63.5) wide $\times 3 / 16$ (4.8) min. thick x full width of door reinforcement plates.
- All drilling and tapping to be done by field men.
- Suggest mounting door stop or holder first and then other hardware to clear. Contact factory if interference results with other hardware.
- Left hand shown - right hand opposite. (Note hole pattern in jamb bracket.)
- All dimensions are given in inches (mm).

## Caution:

Note location of swing clear hinge centerline to determine " $A$ " and " $B$ " dimensions.

No. 9 Series Surface Mounted Door Stops Less Spring
Reversible, non-handed.

1. See other side for installation instructions.
2. Select proper dimensions noted below.
3. All drilling and tapping to be done in field.

These units are dead stop only.
4. All dimensions given in inches

Metric $=$ decimal (numerator divided by denominator)
x 25.4 .
