

ELECTRIFIED MULLION

INSERT INSTRUCTIONS

The Command Access V-KRM-EL is an Electric Power Transfer modification of the Sargent/Yale keyed removable mullion system. This modification allows for safe transfer of power from the head of the door frame to the electric strike location(s). When needed, we maintain the ability to easily remove the mullion without damaging or needing to disconnect the power. This is a modification only and does not include any mullion parts, cylinders or strikes.
