Spills and scraps from the original manufacturing process that are combined with other constituents after a minimal amount of reprocessing for use in further production of the same product do not qualify.
- Manufactured:** Final assembly of components into building product that is furnished and installed by trades [e.g., if the hardware comes from Dallas, TX, the lumber from Keene, NH, and the joists is assembled in Kent, WA; then the location of final assembly is Kent, WA].
- Raw Materials:** Virgin or recovered resources from which the product's components are made [i.e., before processing or manufacturing].
